

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

THE motives which cause people to become Authors are various ; but every mite of information on any subject tending to public utility and benefit, ought to be considered a sufficient inducement thereto, as adding to the general record or fund of literature.

Great Britain having arrived at the highest pinnacle of glory, wealth, grandeur, and importance in the scale of nations, by aid of her numerous commercial resources, which are now unrivalled in every part of the globe, it becomes all individuals of her empire to improve and secure, by every means in their power, that pre-eminent and elevated situation so nobly and honourably obtained.

The commercial dealings between Merchants, Manufacturers, and others, in various and numerous articles, is by making an extra charge on the net cost or value and the profit to be gained thereby, and to allow a discount or abatement on such gross charge, to regulate the various fluctuations in the cost of such goods, occasioned by the variable price of materials, wages, &c. &c.

It is, therefore, of the highest importance, to all persons whose dealings any way require the aid of Discounts, to know with the utmost exactness, what is to be charged as the gross amount of any article they make or sell, to secure the intended net gain or profit, after such discount or abatement has been allowed.

8-10-39 mab

The subject, though nothing is more essential to be perfectly understood, for the interest of a great commercial nation, has never been correctly treated on by any Author; for though rules for computing the Discount to be taken from a gross sum, at any given rate, are perfectly known, no rules for increasing the net cost to the gross amount, with the same ease and accuracy, has ever been published by any author, in this or any other country, that can be ascertained, notwithstanding the most diligent enquiry.

The Tables that have been published, stating the gross amount of any net sum, to gain a certain net profit, after allowing a specified discount therefrom, have served to mislead and injure all persons who have been so unfortunate as to adopt the use of them, and who have experienced considerable loss before their incorrectness was discovered, as will appear by the rules and examples given in the course of this work.

On these considerations, the Author presumes to offer this work, as a correct Treatise on Profits and Discounts, so long wanted, and which he hopes will prove a valuable acquisition to the commercial part of the community, and be found worthy the patronage of every Merchant, Manufacturer, or other dealer who may have occasion to refer to it.

PRELIMINARY OBSERVATIONS.

IT is necessary to state, that net cost is considered as actual *Cash*, and every contingent expence also, such as rent and taxes, cost and wear of tools, &c. postage, carriage, losses, banking commission, stationary, interest of money, clerk's salary, and, in fact, all other expences, (many of which are very considerable) these may all be stated at a per centage, according to the annual amount of returns, and constitute the first amount, to prevent loss by being overlooked, before any item for materials, wages, &c. and it must be further observed, that the profit must be on the gross amount and not on the net cost, as will be explained in the conclusion and other parts of this work, otherwise a person loses the profit of his trade, amounting to the difference of his returns, by being estimated from the net cost and not gross value.

And it is necessary to state, that nothing relating to time of credit on goods sold for discount, present money, or other consideration, is included, they being subject to many and various alterations, and in consequence considered as a private agreement, and which cannot interfere with regular calculations, but must be ascertained according to private contract.

The Rules laid down in this Treatise are rendered as easy as the nature of the subject will admit; and the Tables are arranged, as is conceived, in a conspicuous manner for certain and ready dispatch, in every reference that may be made to them.

Tables of Interest, and for Retailers, which are of great importance, are added, to make the work more complete.

RULE I.
BY DOUBLE POSITION.

Assume an amount as near as you can to the given net cost, profit to be gained, and discount to be allowed, added altogether, and work it as the true sum of gross amount, and note the difference, more or less, than the true cost, for first error. Assume a second amount, and work it in the same manner, and note the difference for second error. Then, as the sum of the errors, if unlike (one more and one less than) the true sum, or their differences, if unlike (one more and one less than) the true sum, to the difference of the supposition, so is either error to a fourth number, which number added to or subtracted from its respective supposition is the true sum required to be found.

EXAMPLE.

Suppose I mean to gain 15 per cent. net money on £100. net cost, and allow a discount of 15 per cent. on the gross charge to a customer—what must I charge?

| | | Gross Charge. | | | | | | Gross Charge. | | | |

The solution thus stated, and the only way by any Rule hitherto published, not only reverts the nature of the question, by finding the gross amount first, but is attended with difficulty to persons not well conversant in arithmetic calculations, and too much loss of time for mercantile purposes, which the following Rules will obviate, and be found equally correct and very expeditious for business.

Previous thereto, if the following Table be learned by heart, it will very much forward all calculations relating to Discounts.

| 37½ is 0 | 7 | 6 | | in the £ Discount, or ¼ and 1-8 of 100 | 0 | 0 | |
| 40 is 0 | 8 | 0 | | in the £ Discount, or 1-5 and 1-5 of 100 | 0 | 0 | |
| 42½ is 0 | 8 | 6 | | in the £ Discount, or ¼, 1-8 & 1-20 of 100 | 0 | 0 | |
| 45 is 0 | 9 | 0 | | in the £ Discount, or ¼ and 1-5 of 100 | 0 | 0 | |
| 47½ is 0 | 9 | 6 | | in the £ Discount, or ¼, 1-8 & 1-10 of 100 | 0 | 0 | |
| 50 is 0 | 10 | 0 | | in the £ Discount, or ½ of | 100 | 0 | 0 |

N. B. The divisions by ¼ and 1-8 are more proper than 1-5 and 1-10, as leaving less fractions.

The gross sums in the following Tables are, mostly constructed by the above Table, and the little differences chiefly arise from using 5ths and 10ths when wanted.

RULE II.

Divide the net cost by the rate of profit, (see the preceding Table of parts), and place the quotient under the net cost, divide the quotients so found by the same rate, and place the quotient under the former; continue to divide each new quotient in the same manner until nothing remains to divide. The several quotients so found, and net cost added together, is the gross amount of the net cost and profit intended to be gained, which is the net cost to a customer, with which, as net cost and discount intended to be allowed, proceed to find gross charge to a customer, to allow the intended discount.

EXAMPLE.

Taking the same as last question, viz. to gain 15 per cent. net on £100, after allowing 15 per cent. to a customer, on gross.

| | Net Cost. | | | Net Cost. | | | 1st Cost & Profit. | | | 2d Gross. | | | | | |

| Say | 0 | 0 | 2½ | | | | Say | 0 | 0 | 2½ | | | | | |

This Statement has been fixed on, containing two operations in one; but if the intended gain is worked by one equal part of the net, it is easier performed.

¶ If the above gross to a customer of £117. 12s. 11½d. was calculated as £115. net, the customer's gross would be £135. 5s. 9½d. from which deduct his discount and own profit. The remainder would be only £97. 15s. instead of £100.

RULE III.

BY VULGAR ARITHMETIC.

As there are 40 equal parts, of $2\frac{1}{2}$ each, in £100, multiply the net cost by the number of $2\frac{1}{2}$ s. contained in the proposed profit, and divide by 40, place the quotient under the net cost, multiply the quotient so found as before and divide by 40, and place the second quotient under the former, continue to multiply and divide each new quotient found until nothing remains to multiply. The sum of the several quotients and net added together is the amount, first cost, and profit, with which proceed, as before, with Discount to be allowed to charge the gross to a customer.

EXAMPLE.

Take the same Example as last, and multiply by 6 and divide by 40, or its equal, multiply by 8 and divide by 20.

| | | | | | | | | | | | | | | | |

This Rule will form most excellent Exercises for any one who wishes to be ready at computing the gross charge of any sum as net cost.

RULE IV.

BY DECIMAL ARITHMETIC.

MULTIPLY the net sum by the decimal of the rate of profit to be gained, and place the product under the net cost. Multiply the products so found by the rate of profit as before, placing that product under the former. Continue to multiply each new product in the same manner until nothing remains to multiply. The net sum and several products added together, is the gross amount of net cost and profit thereon, or net cost to a customer; and calculate the gross charge by the discount he is to have allowed, as before.

EXAMPLE.

(The same Example continued.)

| | | | | |
|------------|---------|-----------------|------------------|-------------------------|
| Net cost | | 100,00000 | Net to Purchaser | 117,64696 |
| 100,00000 | mul. by | ,15 is 15,00000 | .117,64696 | mul. by ,15 is 17,64670 |
| 15,00000 | ditto | is 2,25000 | 17,64670 | ditto is 2,64705 |
| 2,25000 | ditto | is ,33750 | 2,64705 | ditto is ,39705 |
| ,33750 | ditto | is ,05062 | ,39705 | ditto is ,05955 |
| ,00000 | ditto | is ,00759 | ,05955 | ditto is ,00893 |
| ,00759 | ditto | is ,00113 | ,00893 | ditto is ,00133 |
| ,00011 | ditto | is ,00012 | ,00133 | ditto is ,00020 |
| | | <hr/> | | <hr/> |
| | | 117,64696 | | 138,40777 |
| Reduced is | | 117 12 11½ | Reduced is | £138 8 1½ |

This is the most accurate of any Rule, as is evident by the above operation, for it incorporates in the second statement the surplus of the first, which the others cannot. It is too tedious for business, but may be applied in this way after the gross is found. Consider the gross above 100, as the decimal of what is to be added to net, and multiply it by net cost, will give the amount to be added thereto in the above.

EXAMPLE.

Suppose net cost is 15s. this multiplied by ,384 is 5,760 or 5s. 9d. which added to 15s. is £1. Qs. 9d. as per Table.

11

RULE V.

BY ADDITION, WITH TABLES OF DISCOUNT.

TO the net cost add the discount as profit to be gained, according to the Tables, and continue to add the discount of each succeeding discount until nothing remains to be discounted; the sum of the net cost and several discounts added together is the amount of the first net cost and profit; which, with the discount intended to be allowed, proceed to compute the gross amount to a customer for his discount to be allowed.

EXAMPLE.

Suppose (as before) I mean to gain 15 per cent. on £100. and allow a discount of 15 per cent. on the gross charge. What is it?

Cus. gross, as before.

This is the easiest Rule of any, but it requires the aid of Tables to be at hand, which the others do not. Many other different Rules might be given, but it is presumed what has been done is quite sufficient.

IT was the intention of the Author to continue the Scale of Tables to 30 per cent. Profit and 50 per cent. Discount; but it being discovered that the gross amount was the same whether you gain 10 per cent. profit after allowing 15 per cent. discount, or to gain 15 per cent. profit after allowing 10 per cent. (as will be seen by referring to the Tables,) they have been omitted, and the following Tables and Rules inserted instead, being far more extensive and important in all their operations, and fully prove the correctness of the question, for it is evident if a gross amount is to be computed on the net, it is immaterial which is first, if done in more than one Statement, (see Examples 3, 4, and 5.)

A Table of Simple Discounts.

Shewing what ought to be added to the net cost of any sum to gain on the gross amount of such sum a certain net per cent. thereon, and allow no discount therefrom, or any abatement whatever.

THE foregoing Table will be found of very extensive use in every case requiring simple Discount only, such as a Recovery on Shipping Insurance, Drawbacks, to Retailers in particular, &c. and all who wish to ascertain the gross amount when a discount is to be allowed to a second or third person; which is by adding the gross of discount to be allowed to first discount and profit. The amount will be the gross charge to have a discount allowed.

EXAMPLE I.

Suppose I buy goods the amount of £1. what must I charge to gain 12½ per cent. and allow 25 per cent. discount to a customer?

EXAMPLE IV.

A parcel of goods cost £1. net, which I mean to sell to gain 45 per cent. after allowing 25 per cent. discount. What is gross charge?

| | | | |
|---------------------------|----|----|----|
| | £. | s. | d. |
| To gross for 45 per cent. | 1 | 16 | 4½ |
| Add for 25 per cent. | | | |
| or at 6s. 8d. in £ | 0 | 13 | 1½ |
| Gross charge | 2 | 8 | 6 |

See Table for proof.

N. B. The third and fourth Examples fully explain what is before stated. The gross amount is the same, which is charged first the gain and net cost, or the discount to be allowed. But discount must be taken from gross in the usual way.

EXAMPLE V.

Suppose A buys goods which cost £1. net money, and sells to B to gain $12\frac{1}{2}$ per cent. on his net cost, and allow B 25 per cent. discount on gross. B sells them to C to gain 15 per cent. After allowing C 25 per cent. what is the gross to C?

To A's gross to gain $12\frac{1}{2}$ $\begin{smallmatrix} \text{£. s. d.} \\ 1 \quad 2 \quad 10\frac{1}{2} \end{smallmatrix}$
 Add for 25 per cent. dis. $\begin{smallmatrix} 0 \quad 7 \quad 7\frac{1}{2} \end{smallmatrix}$
 or at 6s. 8d. in £ $\begin{smallmatrix} 0 \quad 7 \quad 7\frac{1}{2} \end{smallmatrix}$

B's gross charge $\begin{smallmatrix} 1 \quad 10 \quad 5\frac{1}{2} \end{smallmatrix}$
 B's dis. 25 per ct. deduct $\begin{smallmatrix} 0 \quad 7 \quad 7\frac{1}{2} \end{smallmatrix}$

Leaves B's net or A's gross $\begin{smallmatrix} 1 \quad 2 \quad 10\frac{1}{2} \end{smallmatrix}$
 Add for 15 per cent. at 8s. 6 $\frac{1}{2}$ d. $\begin{smallmatrix} 0 \quad 4 \quad 0 \end{smallmatrix}$

C's net or B's gross $\begin{smallmatrix} 1 \quad 6 \quad 10\frac{1}{2} \end{smallmatrix}$
 Add for C's dis. 25 per cent. or $\begin{smallmatrix} 0 \quad 8 \quad 11\frac{1}{2} \end{smallmatrix}$

C's gross amount requir. $\begin{smallmatrix} 1 \quad 15 \quad 9\frac{1}{2} \end{smallmatrix}$

PROOF.

C's gross amount $\begin{smallmatrix} 1 \quad 15 \quad 9\frac{1}{2} \end{smallmatrix}$
 Discount 25 per cent. $\begin{smallmatrix} 0 \quad 8 \quad 11\frac{1}{2} \end{smallmatrix}$

C's net or B's gross $\begin{smallmatrix} 1 \quad 6 \quad 10\frac{1}{2} \end{smallmatrix}$
 B's discount 15 per cent $\begin{smallmatrix} 0 \quad 4 \quad 0 \end{smallmatrix}$

B's net or A's gross $\begin{smallmatrix} 1 \quad 2 \quad 10\frac{1}{2} \end{smallmatrix}$
 A's profit $12\frac{1}{2}$ per cent. $\begin{smallmatrix} 0 \quad 2 \quad 10\frac{1}{2} \end{smallmatrix}$

Leaves A's net cost $\begin{smallmatrix} 1 \quad 0 \quad 0 \end{smallmatrix}$

Multiply the amount of £1. by any number of £s, and it will be gross to any amount.

N.B. This question shews the immense increase of the net cost by passing through many purchasers, by importation, &c. and the statement may be continued to any number of dealings in the same way.

MERCANTILE QUESTION.

Suppose a merchant's invoice to his correspondent is £364. 15s. 11d. and he is to pay underwriters' for insurance £5. 5s. per cent. Policy and Duty 5s 6d per cent. Of Irregular Discounts.

These are such as do not proceed by equal 2½s. but are properly fractional rates, or unequal parts of a £.

EXAMPLE.

I buy goods which cost £20. net money, which I mean to gain by sale 11½ per cent. after allowing a purchaser 3½ per cent. discount.—What must I charge?

11½ per cent. is 2s. 3d. in the £, and 3½ per cent. is 9d. in the £.

The Effects of allowing extra Discounts on Gross Amount.

EXAMPLE I.

Suppose I deliver an Account at the end of the year, and the gross amount is 34l. 12s. 7d. on which I mean to gain a net profit of $1\frac{1}{2}$ per cent. after allowing a Discount of 30 per cent. on the gross; but, in consideration of prompt payment, I agree to allow 35 per cent. Supposing I should gain $12\frac{1}{2}$ per cent. what is the loss out of my first intended gain, by second agreement?

Reduction and Alteration of Discounts.

Reduce the several Discounts to one sum, which deduct from gross Amount leaves net Cost, with which calculate your Profit, and Discount intended to be allowed.

Suppose a Merchant has the following sums, which he means to charge in one sum to gain $12\frac{1}{2}$ net thereon; after allowing a Discount of $12\frac{1}{2}$ per cent to his correspondent.

New Rules for computing Interest, when Tables are not at Hand to refer to.

Multiply the Sum or Amount of any Bill, Draft, &c. by the Number of Days it bears Interest, double the Product and divide by 61. The Quotient is the Interest in Pence, deducting from the Amount of Interest one Penny for every £1. 10s. 0d.

EXAMPLE.

| | | | |
|---|-------|----|----|
| What is the Interest of £30. for 77 Days? by Tables | 0 | 6 | 3½ |
| What is the Interest of £25. for 84 Days? ditto | 0 | 5 | 9 |
| What is the Interest of £20. for 90 Days? ditto | 0 | 4 | 11 |
| What is the Interest of £20. for 100 Days? ditto | 0 | 5 | 5½ |

Arrangement of Tables of Net Cost and Gross Amount.

The first Column is the Net Value of any Article, and the Gross Charge includes the Net Cost, Profit thereon, and Discount intended to be allowed. They commence with 3d. and increase gradually to 10s. 15s. between which and £1. and between £10. and £20. to £10. is a Space to prevent Accidents, in taking out wrong Sums. Also every double Page contains four different Discounts, which may be varied at pleasure, and secure the intended Profit.

EXAMPLE.

Suppose Goods cost £20. Net Money, and I wish to gain 20 per cent. Net thereon, after allowing the respective Discounts of 12½, 15, 17½, or 20 per Cent.

| | | | | |

An Example more may be necessary, to shew the Use of the Tables. Suppose a Lot of Goods cost £46. 10s. 0d. what must I charge to gain 17½ per Cent. after allowing 15 per Cent. Discount?

THE TABLES OF DISCOUNT

Commence at 10d. the lowest equal division of 1*l.* at 2½ per cent. and take the progressive equal parts of 10*s.* as well as the gradual increase of 1*s.* afterwards to 12*s.* 6d. 15*s.* and 17*s.* 6d. between which sums and 1*l.* is a space to prevent taking a wrong sum; the same precaution is observed between 10*l.* and 20*l.*

THE TABLES OF INTEREST

Commence with 1*l.* and gradually advance to 30*l.* thence increasing to 100*l.* and from 1 to 90 days, 100 and 200 days, which are placed together for readily making use of; the same method has been observed respecting a space.

As it frequently must happen, in money transactions, Tables of Interest are not to be procured, the Author has added new and expeditious Rules, whereby the Amount of Interest of any number of Bills, Drafts, or Notes, of different sums, and times of bearing Interest, may be correctly calculated without Tables.

The Rules are founded on the year to consist of 366 days, or 30½ days to the month; the Interest, of course, is one penny in the pound for that time, which is as correct as Tables can be, making an allowance for one day's Interest, which is very easy retained in memory for every purpose.

THE TABLES FOR RETAILERS

Are very ready for young persons and others to mark their goods, and will save much time even to an experienced person. By these Tables it will appear if 15 per cent. is to be gained on 14*s.* net cost, the charge must be 16*s.* 6d. and if an abatement is made of 6d. the gain is 12½, and for other sums in the same way.

CONCLUSION.

THIS Work is complete according to the best information obtained from the various Merchants, Manufacturers, &c. which the Author has consulted, and is conceived to be fully adequate to every statement that may be wanted, by all persons who wish to ascertain their Profits with great accuracy, simple or with Discounts to be allowed to the purchaser of such goods as they manufacture or deal in.

Those persons who conceive the Profit should be on the Net Cost, and not on the Gross Returns, may compute the Gross Amount in the same way to a Customer, and with equal correctness, as the rules are the same; but such as are of the contrary opinion, will find, for instance, at 15 per Cent. the gross is £117. 12s. 11½d. now, if any one rightly considers that £15. is the Profit of the £100. Net Cost, and the £2. 12s. 11½d. is the Profit, &c. of the £15. therefore, if the Profit is on the Net Cost and not on the Gross Returns, that part of the Profit on a Trade is lost which is equal to the difference of the Net Cost and the Gross Returns, viz. £2. 12s. 11½d.

The Author will be happy to receive any information on this or any other subject of general utility, which shall be attended to with the utmost punctuality, in any future edition; for it is his wish to render this work as complete as possible, by collecting every idea relating to Commercial Interest, and arranging simple Rules and correct Tables, for expedition, in all Money and Mercantile Transactions.

The Calculations in this Treatise, and the Tables annexed, will all prove each other with the greatest exactness, allowing loss by fractions; and the Author wishes any one to compare them with others, and judge for themselves.
